**The Honorable Frances Ulmer,**

**Member, National Commission on BP Deepwater Horizon Oil Spill and Offshore Drilling Commission: I am pleased to write you in regard to the clean up of the BP Deepwater Horizon, particularly with your 30 years of public service on such things as Alaska Coastal Policy Council, coastal management, the Exxon Valdez Spill and 18 years of being Mayor of Juneau tells me you were trusted and loved by a very independent constituency! Our product is the product to address the current BP GULF Spill, it's use should be mandated in any ongoing production or new exploration for the real protection of our resources. Our product, OIL SPILL EATER II, is the answer to remediate the BP Gulf Spill, if used initially as requested, there would have been no oil going ashore as it is now. Our product which is on the NCP List and has all necessary certifications, is non-toxic, takes the oil, even with toxic dispersant [COREXIT] in it, to an end point of co2 and water. OSE II can be used on birds, animals, grasses, plants and around fish with no harmful effects. It is the answer in open water, so the oil never comes ashore, addressing the oil only once, keeping the oil from even coming ashore if used timely, it also successfully address' the oil in marshes, estuaries, beaches, surface oil, subsurface plumes and oil laying on the ocean floor. We are submitted to BP, they say that OSE II is at level 3 heading to level 4 towards a test, but all testing has been done. I pray that at least you will at least have one of your personal assistants to review the material I submit to you today, it really is the way to restore the unique eco- system, and not further use of more toxic dispersant. When BP wanted to use the toxic COREXIT, it was literally approved overnight. I am attaching 3 items: 1. COAST GUARD Overview White Paper. 2. Meeting with Admiral Mary R. Landry 3. RRT 6 LA.**

**I would request that if you have any questions that you feel free call Mr. Steven R. Pedigo Chairman/CEO of OSEI Corp. on his personal cell # 214-783-6992 or if I can be of any help call me at any time @ 940-781-7777. Thank you four tireless work on this daunting undertaking. Thanks and GOD bless, Dennis 940-781-7777**

**Respectfully, Dennis**

**PS: Because these files are so cumbersome and with my being somewhat electronically challenged, I wanted to get a hard copy for your review. Our website is "[www.osei.us](http://www.osei.us)", where you can see more details, under "news" you can see videos of our tests.**
